PROJECTS

SafeRoute - A Travel Safety App

A mobile application that ensures safer travel by providing real-time alerts, region-wise risk assessment, SOS emergency support, route planning, and a 'Stay & Rest' feature that suggests safe places with user ratings.

- Built a working version of the Route Planner and the upvote/downvote system for the 'Stay & Rest' page.
- Collaborated with four-member team during integration and testing of the final features.

CERTIFICATIONS

- Flutter & Dart- The complete guide, Udemy
- Programming in Java, IIT Kharagpur
- Problem solving using C, IIT Kharagpur
